**Chairman Emeritus – The Society of Laparoscopic and Robotic Surgeons (SLS)
Innovator – Educator - Pioneer**

In the early 1980's I was publishing a women's health newsletter and received a package of information from Professor Kurt Semm, the then unknown father of laparoscopic surgery. When I read the materials, I knew that I had to visit Professor Semm in Germany and see for myself. I realized the tremendous benefits to patients and the future potential of Minimally Invasive Laparoscopy. By the way, in those early years there was great criticism by the established medical community about this new idea of performing major surgery through small incisions, I knew that I had to persist in improving understanding to overcome this criticism and worked to train surgeons about this new revolutionary way of helping patients. I saw the need for education on a broader scale and **founded SLS to establish standards and education for this then new field.** SLS has grown over the past 30 years to the largest non-profit multispecialty medical society of its kind in the world and of course minimally invasive and laparoscopic surgeries are now the gold standard for many fields.

Founder – ORReady

World Initiative to improve the outcome for Six Million Surgical Patients

Recognized as an innovative contribution to the field of CME and Patient Safety, **ORReady** has been selected for the ACCME 2011 Medical Specialty Societies Member Section Great Idea Award. The objective of the ORReady Initiative is to improve surgical outcomes worldwide and to be a hub of information for surgeons and facilities that want to become Centers of Merit for surgical safety. Various forms of the steps suggested in ORReady have been adopted by top centers, surgeons, and nurses in multiple specialties, reducing their errors by 40% and cutting deaths in half. Visit the **ORReady website** www.orready.org to learn about these powerful tools.

Clinical Professor Emeritus University of Miami, School of Medicine

As a young clinician I arranged to bring Professor Semm and his team from Germany to the US to the UM Medical School and Jackson Memorial Hospital and organized the first training courses for MIS, again there was skepticism about this new technology, but I and many other early adopters weren't deterred. Over the years I've worked to bring these concepts to the world with training and education physicians in multiple specialties and countries.

Personal Mission

"It's The Outcome"

Family

I am fortunate to have a wonderful life partner, my wife Janis Chinnock Wetter – We have worked around the world in non-profit postgraduate medical education to advance better patient outcome and teach Minimally Invasive Surgery.

Interests

Since childhood I have has been fixing and restoring things, making things work better some adventures included an antique radio at age 13, a 100 year old player piano during Medical School, Antique sports car during Residency, Arts and Crafts and Mission Furniture and historic homes and gardens and not in the least the fixing and helping improve the fields of surgery and medical education.
I love to make things work better and I love classic things.

Recent Honors

2019 Medical Training Magazine - One of Nine Named Patient Safety Advocates of 2019

"Honors a group, team, hospital or individual they felt made a significant difference to Patient safety and patient outcomes"

2018 Endo Hero of the Year

"Each year, Worldwide Endo March selects one person who has contributed significantly to those affected by endometriosis, and names him or her the "Endo Hero of the Year." This year, we are proud to honor Dr. Paul Wetter, Chairman of the prestigious Society of Laparoendoscopic Surgeons, the largest multidisciplinary minimally invasive surgical society in the world. Dr. Wetter has been nominated and elected unanimously by the Worldwide EndoMarch Board of Directors as the 2018 recipient of the "Endo Hero of the Year Award", for his outstanding contributions to Worldwide EndoMarch's goals. Among his initiatives, Society of Laparoendoscopic Surgeons has started a subspecialty surgical fellowship for endometriosis, the first ever in any academic setting.

Dr. Wetter joins the previous accomplished honorees, Dr. Linda Guidice, past president of the American Society of Reproductive Medicine, Dr. Robert Wah, past president of the American Medical Association, and Dr. Hal Lawrence, executive vice president and chief executive officer of American Congress of Obstetricians and Gynecologists."

One of 25 Original Signators to the Seoul Declaration for Ethical Medical Technology

"The Seoul Declaration on ethical medical technology is founded on the policies articulated in the World Health Assembly resolution WHA55.18 (2002), which urged Member States to "pay the

closest possible attention to the problem of patient safety and establish and strengthen science-based systems, necessary for improving patient safety and the quality of health care”.”

Additional Professional Experience

Non-profit Medical Editor and Non-profit Medical Publisher

I am Founding Editor of the classic medical textbook in Minimally Invasive Surgery, and under my stewardship **Prevention & Management of Laparoendoscopic Surgical Complications**, is now in its **Fourth and Digital Edition**, The First edition was a sellout and translated in Mandarin and Portuguese. The Second Edition was even more innovative and was the first of its kind open access online medical textbook. The third edition, broke new ground in Open-Access Medical Education with embedded videos that walk surgeons through difficult procedures and translations to twenty languages. The non-profit third edition is available for free, over the Internet, to surgeons, residents and students in multiple specialties and countries around the world.

JSLs, Journal of the Society of Laparoendoscopic Surgeons JSLs,

My interest in publishing lead to **co-founding and the role of Managing Editor**, JSLs has worldwide circulation, I used my interest in computers and the internet to develop this innovative differently published “Journal For A New Era” a highly rated peer review journal, listed on *Index Medicus* and MEDLINE, this was and is a pioneering publication in open access, free distribution over the internet and as such JSLs has skyrocketed to the top 100 of over 10,000 scientific publications in downloads of scientific information. This breakthrough Idea a Non-Profit Journal by a Non-profit publisher is now the standard model and has led to this normally unobtainable success. In 2010 JSLs became **100% Open Access, high quality peer reviewed journal on PubMed Central one of the early top tier journals to reach this new important standard. In 2017 and 2018 JSLs had over 1,200,000 downloads each year.**

A similar interest led to **the innovative online journal *Laparoscopy Today*** and recently CRSLs which along with SLS’ **forward thinking non-profit educational websites** at the forefront of web technology and ever evolving with the internet to present and allow sophisticated searches of the latest information and education from National and International Meetings, Textbooks, Surgical Videos, all uniquely open access to serve the world medical community.

“This is quite honestly the most impressive information available to surgeons today.”

Richard M. Satava, MD
Professor, University of Washington Medical Center
Senior Science Advisor, US Army Medical Research and Materiel Command

Early Developer on the Apple Platform

I had computer experience and electronics experience prior to medical school and was an early registered Apple Developer when there were very few. This started as a small number and has grown in recent years to about 17,000,000 developers worldwide. The cross pollination of this and medicine has allowed me to follow and predict the influence of computing power and electronics in medicine. We are in the early stages of a significant shift in medical care and health due to these changes that will affect the practice of medical care at all levels.

Keynotes

- 2018 Keynote – **How Medical Apps Will Change Medical Practice** – Med Device and Robot – Med Innovation & Biotechnology, Seoul, Korea
- 2017 Keynote – **Medical Innovation** – All India Congress of OBGYN
- 2015 Keynote - OpenEndoscopy Forum – **Medical Apps, Massachusetts Institute of Technology**
- 2015 Keynote – Medical Apps – ISGE/AGES Melbourne Australia
- 2014 Keynote – The Next Big Wave of Medical Innovation iSMIT **Shanghai Technology University**
- 2014 Keynote – Shanghai Technology University – Computing power and nanotechnology shifts in healthcare
- 2014 Keynote – Assn Surgical Technology – Surgical Safety ORReady
- 2013 Keynote – iSMIT/NCIGT/NIH, Washington, D.C.
- 2011 Keynote – Minimally Invasive Robotic Society, Athens, Greece
- 2010 **Keynote** – Australian Gynaecological Endoscopy & Surgery Society and International Society of Gynecologic Endoscopy, SLS sessions, Sydney Australia
- 2009 **Keynote** – Society for Minimally Invasive Therapy – Sinia, Romania
- 2008 **Keynote** – **Surgical Education** – Training vs Complications Latin American Cirugia Endoscopia, Guatemala City, Guatemala
- 2008 **Keynote** – International Society of Gynecology Endoscopy
- 2006 **Keynote** – Society for Medical Innovation and Technology
- 2005 **Keynote** – Congress of European Association of Endoscopic Surgeons
- 2003 **Keynote** – First European Endoscopic Surgery Week, Glasgow, Scotland
- 2000 **Keynote** – Jubilee World Meeting University Professors, Host –Pope John Paul II, Vatican, Rome. Mankind and Cancer - Surgical Oncology at the Start of the Third Millennium. Rome, Sept
- 2000 " Treatment of Cancer Patients: Ethical and Legal Issues" Vatican, Rome
- 2000 **Keynote** – First Meeting Israel Society of Gynecologic Endoscopy
World Congress of GYN Endoscopy, Tel Aviv, Israel 2000

Medical, Surgical and Educational Firsts

In my 25year surgical career, I performed many of the **first Advanced Laparoscopic Surgeries** in US and in Florida for **appendectomy, ectopic pregnancy, ovarian cysts, hysterectomy, video laparoscopy** and more. **I was fortunate to be part of the teams to train the initial groups of general surgeons and endourologists, when they first began using laparoscopy**

My interest in design and innovation contributed to many of the early and current laparoscopy instruments in use today that have helped foster advanced minimally invasive surgery in fields of Gynecology, General Surgery, Endourology, Bariatric Surgery and Robotic Surgery.

Awards, Honors and Appointments

Senior Advisor - International Society for Medical Innovation and Technology

Editorial Board – Gen Surgery News

Managing Editor – JSLS and CRSLs, journals of the Society of Laparoendoscopic Surgeons

Advisor – Chinese Journal of Minimally Invasive Surgery

Delegate – AMA House of Delegates

Peer Reviewer –Stemmler Fund, National Board of Medical Examiners

Accredited **Judge** – American Orchid Society

Member – World Health Organization GIEESC "The World Health Organization Global Initiative for Emergency and Essential Surgical Care (GIEESC) is a global forum that convenes multidisciplinary stakeholders representing health professionals, public health experts, health authorities and local and international organizations."

2017 Advisor Shenzhen University

2016 International Scientific Committee New European Surgical Academy

2015 **Adjunct Professor** – Moscow Institute of Physics and Technology

2012 Visiting Professor – Chinese Journal Minimally Invasive Surgery

2011 Visiting Professor – University of Singapore

2011 ACCME (Alliance for CME) Medical Specialty Great Idea Award for ORReady

2009 Jurnalul de Chirurgie [Journal of Surgery] –Honorary Editor

2007 **Visiting Professor** – Societa Italiana di Endoscopia Ginecologica, Palermo, Italy

2006 **Visiting Professor** – Croatia Congress MIS Dubrovnik, Croatia

2004 **Honorary Chair** – Endoscopic Surgeons of Great Britain and Ireland

2004 **Honorary Mayor** – Worcester, UK in recognition by the Endoscopic Surgeons of Great Britain and Ireland

2004 **Excel Award** – Each year is given to a surgeon who has made outstanding contributions to laparoendoscopy and minimally invasive surgery. Recipients have been from various specialties and nationalities, all having the common element of excellence in the field

2002. **Honorary Advisor** Beijing Anzhen Hospital Training Center for Endoscopic Technology, China

2002 **Visiting Professor** Appointment -Harbin Medical University, China

2002 **Delegate** Congress of Gyn Endoscopy and Innovative Surgery, Berlin, Germany

2002 **Visiting Professor** - Surgeon in the 21st Century- Beijing, China

2002 **Delegate** - International Society for Gynecologic Endoscopy, Berlin, Germany.

2002 **Delegate** - European Association of Endoscopic Surgery, Lisbon, Portugal

2000 **Visiting Professor** – Singapore General Hospital

2000 **Honorary Director** Hunan Provincial Peoples Hospital PRC, Hunan

2000 Appointment Honorary Consultant – Training Center for Pediatric Laparoscopic Surgery, Children’s Hospital of Hunan Province, China

1999 **Visiting Professor** – French Laparoscopy Society

1999 **Visiting Professor** – 4th Brasileiro de Video-Cirurgia, Florianopolis, Brazil

1999 **Visiting Professor** – University of Rome Tor Vergata

1999 **Delegate** Asian and Oceanic Congress of Obstetrics and Gynecology

1999 **Tribute** by the Congresso Brasileiro Video Cirurgia

1999 **Honorary Director** at Opening of First Laparoscopy Training Center in China, Fushon (Guangzhou, China)

1996 – **Professor**, Asociacion Mexicana De Cirugia Laparoscopica

In 1995 Paul was recognized with U/M Medical School **Teaching Award** for commitment to excellence, enthusiasm for teaching, based on the Innovative Freshman and sophomore course he helped create and teach for 20years.

1995 **Certificate of Appreciation and Recognition** – Chinese Academy of Medical Science for academic activities in China for helping to bring Minimally Invasive Training techniques to China.

1995 Asociacion Costarricense De Cirugia - **Professor**

1993 **Alpha Omega Alpha** – Alumnus Member University of Miami

1980 American Academy of Family Physicians For Teaching activity in Family Practice

MECO For outstanding support for the Medical Education and Community Orientation Program of the American Medical Student Association

Education

1971-75 **University of Miami, School of Medicine, M.D.'75**

Vice-President, Sophomore Class

Alpha Omega Alpha Alumnus Member

Omicron Delta Kappa-National Leadership Society

1969-71 **University of Miami, B.S.** awarded 1971 Chemistry

Alpha Epsilon Delta-Premedical Honor Society, Vice President.

Irwin Honor Scholarship

Post Graduate Training

1975-79 **Resident and Chief Resident**
Department of Obstetrics and Gynecology
Jackson Memorial Hospital, University of Miami.

Harvard Medical School Gynecologic Pathology

University of Colorado, Beth Israel Hospital OB/GYN

Advanced Pelviscopy, Laparoscopy Prof. Kurt Semm, M.D. Kiel, W.Germany

1979-97

Industry

1980's -Member of Design Team at **Symbiosis Corporation** for first high-quality, low-cost disposable laparoscopic instruments, including 5 and 10mm scissors, dissectors, and grasping devices. Which later became part or the line for Ethicon Endosurgery

1990's **CNS Technology** – Collaborated in development of Brachytherapy seeds for treatment of prostate cancer.

1990's Co-founder of **Syntheon LLC**, which has developed devices in use today for Gastrointestinal, Cardiovascular, Urologic and Minimally Invasive Surgery, and has resulted in at least 4 spin-off corporations.

Scientific Chairman of the Following Conferences

Minimally Invasive Surgery Week 17 Boston MA 2016

18th International Congress and EndoExpo Society of Laparoendoscopic Surgeons, Annual Meeting, Boston, MA September 2009

17th International Congress and EndoExpo Society of Laparoendoscopic Surgeons, Annual Meeting, Chicago, IL September 17-20, 2008

AsianAmerican MultiSpecialty Summit III Laparoscopy and Minimally Invasive Surgery, Honolulu, HI, Feb 6-9, 2008

16th International Congress and EndoExpo Society of Laparoendoscopic Surgeons, Annual Meeting, San Francisco, CA September 5-8, 2007

EuroAmerican MultiSpecialty Summit III Laparoscopy and Minimally Invasive Surgery, Miami Beach, FL Feb 21-24, 2007

15th International Congress and EndoExpo Society of Laparoendoscopic Surgeons, Annual Meeting, Boston, MA September 6-9, 2006

AsianAmerican MultiSpecialty Summit II Laparoscopy and Minimally Invasive Surgery, Honolulu, HI, FI Feb 8-11, 2006

14th International Congress and EndoExpo Society of Laparoendoscopic Surgeons, Annual Meeting, San Diego, CA September 14-17, 2004

EuroAmerican MultiSpecialty Summit II Laparoscopy and Minimally Invasive Surgery, Miami Beach, FI Feb 23-26, 2005

13th International Congress and EndoExpo Society of Laparoendoscopic Surgeons, Annual Meeting, New York, NY September 29- Oct 2, 2004

AsianAmerican MultiSpecialty Congress of Laparoscopy and Minimally Invasive Surgery Honolulu, HI Conference 2/4-27/04
